EXPERIENCES

Silex, Valence—*Full stack web developer*

AUG 2021 - PRESENT (1.5 years)

CEO of Silex Lab, an enterprise software company created with two associates. The main activity is setting up and customizing enterprise resource planning software (ERP).

Freelance, Nancy—*Full stack web developer*

Jan 2020 - PRESENT (3.5 years)

Worked as a freelance for multiple clients in diverse fields such as food production (aquaponics), GPS, sport, and design offices (thermal, geothermal). Leading the development process through the entire software life-cycle under Agile methodology. Started every web project from scratch, choosing technologies and code structure, development configuration and deployment to production.

Sopra Steria, Nancy—*Junior Cobol Developer*

MARCH 2019 - NOV 2019 (6 months)

First small experience as a junior developer in the bank domain.

PROJECTS

Aquaponics—*4 apps* - 3 years

I was in charge of developing 4 apps for professionals, from mobile-oriented, to desktop-oriented through tablet-oriented. For this purpose I used multiple technologies such as SvelteKit, JS, CSS/Sass, REST API, php 7, and MYSQL.

calANDrier—*Annual Calendar* - 2 years

Creation of a SaAs from scratch, an online annual calendar with a specific layout. To achieve a user-friendly and visually appealing interface, I utilized SvelteKit, CSS/Sass, and Typescript. The back-end architecture was built using Javascript and Supabase to ensure scalability and reliability. Accessible at app.calandrier.com

ERP with Shopify and DHL labels — *ERP customization*

For this project, I had to connect a Dolibarr ERP to a Shopify Store to synchronize orders, and also to the DHL SOAP API to generate labels for products shipments.

SKILLS

JS, CSS, SvelteKit

PHP, MYSQL,
TailwindCSS

TS, Node, Sass,
NodeJS, DaisyUI, Astro

APIs

Google Calendar, Outlook Calendar, Shopify, Trello, Jira, Zendesk, Supabase, Stripe, MailChimp, DHL
